## Professional Experience

### **Folio3 Pvt Ltd (Senior Software Engineer)**

[Jun 2010 – July 2011]

Folio3 caters almost every available development technology to fulfill clients need. My area of focus there was PHP / MySQL. The major responsibilities during the tenure were,

- Interacting with clients for requirement analysis, status updates and trainings.
- Designing Software Architecture
- Creating websites based on open source software like Drupal /Wordpress.
- Lead the team of juniors to mentor them and to make sure the project get finished on right path.
- Project deployments and management of Linux servers.

### **HireLabs (Senior Software Engineer)**

[Jan 2010 – May 2010]

Worked with Hirelabs to create and enhance their innovative human resource screening and assessment system, major responsibilities included,

- Create the in-house Questions Base system to manage different tests, questions and scoring criteria. The system can create tailored made assessments on the fly.
- Optimize the system for better SQL performance and security.

### **BL-Properties (Web Developer)**

[April 2008 – Dec 2009]

Worked as a part of team responsible for creating and maintaining ERP and CRM solutions for BL-Properties (blproperties.net). My major responsibilities were,

- Creating intuitive UIs to cater non-technical audience.
- Keep enhancing the system by injecting new features to ease customers.
- Optimizing system for speed and security.
- On page Search Engine Optimization.

### **Salsoft**

[Sep 2006 – April 2008]

Salsoft was USA based ISO-9001 certified software house, worked there as part-time Web Developer, major highlights of the job includes,
